PROFILE

I'm a Full-Stack Developer who builds web apps from the front end to the back end. I like working with different tools to make things easy to use, reliable, and simple. I'm always excited to learn new skills and enjoy working with others to create great software.

PROJECT

Learning Management System 2026 - PRESENT
Full-Stack · PERN Stack [Live](#) [Github](#)

- Built an online learning platform where users can browse courses, enroll, and track learning progress.

Note Taking App 2026 - PRESENT
Full-Stack · MERN Stack [Live](#) [Github](#)

- Built a note-taking web application that allows users to create, organize, search, and manage notes.

EXPERIENCE

- Implementing authentication, database design, API integration and application security practices
- Developing full-stack web applications in modern web technologies
- Building responsive and user-focused interfaces with scalable backend systems.

EDUCATION

Bachelor of Computer Science (In Progress)
Western University · Phnom Penh, Cambodia 2024-PRESENT
